

MANIKO

Double temperature, double pleasure

Complete coffee pleasure
in the palm of your hand.

The **special cavity** in the structure of the cup keeps your coffee at the optimal drinking temperature without warming the outside, so you can sip it at ease and savour it during a pleasurable coffee break, either in company or alone. The unique design gives Maniko **lightness** and **refinement**: an item to be handled and kept in good care to maintain its qualities over time.

Maniko. Extract from
a true story.

Even the worst things can lead to something positive. Maniko was created in 2020 from an idea by Carlo Barbi in the middle of lockdown.

The enforced business closure resulted in an opportunity to develop a project that had been toyed with for some time, to give end customers an innovative, uniquely designed coffee cup for a whole new coffee-drinking and taste experience.
